PROFESSIONAL SUMMARY

AI & Data Science graduate with hands-on experience in full-stack web development, machine learning, and Python programming. Skilled in building scalable web applications, integrating APIs, and developing data-driven solutions using modern technologies. Strong understanding of software development, data processing, and problem-solving with the ability to quickly adapt to new tools and fast-paced environments. Passionate about creating practical and impactful technology solutions through continuous learning and innovation.

SKILLS

Languages: Python, JavaScript, Java

Web Technologies: React.js, HTML5, CSS3, Responsive Web Design, Node.js, Express.js, RESTful APIs

Database: MongoDB, MySQL

Tools: Git, GitHub, VS Code, Postman, Figma

Practices: Agile/Scrum, Code Reviews, SDLC, Software Documentation

Concepts: Troubleshooting, Debugging, Software Quality Standards, API Integration

INTERNSHIPS

Senior Developer Intern

Aug 2025 – Apr 2026

RCTS – IIIT Hyderabad

- Built student dashboard for DevStack hackathon management platform using React.js and Node.js, serving 200+ participants with role-based access control (Admin, Mentor, Student roles)
- Designed and implemented RESTful APIs for team registration, submission tracking, mentor assignment, and real-time event updates using Express.js and MongoDB
- Participated in code reviews, Agile sprints, and technical discussions.
- Documented implemented features and technical workflows.

Developer Intern

Jan 2026 – Mar 2026

Piramal Swasthya

- Automated API documentation pipeline by building GitHub workflows to generate and validate OpenAPI JSON specifications, reducing manual documentation time by 60%
- Developed database health monitoring APIs for MySQL (advanced diagnostics including connection pool utilization, query performance, and replication lag) and Redis basic health verification, ensuring 99.5% database uptime
- Implemented Git hooks for commit quality enforcement (pre-commit validation and commit message formatting), improving code consistency and reducing merge conflicts by 40% across development team
- Contributed to healthcare-focused backend services with REST API development, authentication integration, and database optimization in production environment

PROJECTS

Devstack Hackathon Platform (Fullstack – MERN)

- Contributed to a full-stack hackathon management system using **MongoDB, Express.js, React.js, and Node.js**.
- Built responsive **React.js** dashboards for Admin, Mentor, and Student roles.
- Implemented RESTful APIs and assisted in MongoDB schema design.
- Collaborated using Git and participated in debugging and code reviews.

MedChat – AI-Powered Medical Chat Application

- Developed a full-stack medical chatbot using **React.js** for the frontend and **Flask** for the backend.
- Integrated **Groq LLM API** and transformer-based embeddings for medical question answering.
- Implemented a **RAG-style pipeline** by retrieving relevant medical content and generating grounded responses.
- Added **JWT-based authentication**, input validation, and **persistent chat history storage** using a database to maintain conversational context.

EDUCATION

B.Tech – Artificial Intelligence & Data Science

2022 – 2026

KIET, Korangi

GPA: 8.08

Final Year Student

CERTIFICATIONS

- MERN Stack Development – Infosys Springboard
- Introduction to Python – Edyst
- Foundations of Modern Machine Learning – IIIT Hyderabad
